GSS COVID-19 RELIEF PROGRAM

Key intervention of our response to COVID 19

We have taken some initiatives to tackle this harsh situation which we are facing worldwide the pandemic covid-19. Here are some of the factors towards fighting the covid-19.

Food distribution-we are trying to provide food and basic essentials for the people who have not money and cannot buy these basic essentials for them. We are providing some food essentials such as rice, flour, pulses and also cooked meals when they have no food.

Making masks-we are making masks at home and distributing these masks to the people who cannot buy the masks. We are also telling them the necessity of the equipment by making them aware about perfect hygiene and health awareness.

Awareness program-some of the people of society are in very critical condition that they cannot buy sanitizers, masks and cannot buy medicines for them so through the awareness programs of the organization we are also teaching them about the

cleanliness of their surroundings and maintain perfect hygiene by washing hands and telling them to avoid public gatherings.

We are providing them the essentials by maintaining proper distance and hygiene and also teaching them in this way.

By these methods we are doing our part for our fellow people who are need in this critical situation. By this, we are assure that soon this harsh pandemic will end and we can have normal life ahead and come over this pandemic covid-19 soon.

However, we are doing with our limited resources. We want to do more and more work for the areas where we cannot go because we have not more resources that to reach out our goals. So we need some more resources by which we can be reachable to more peoples and targeted areas.

We are making our contribution for tackling this world wide pandemic covid-19, so that the people who are not having proper food for them, hygienic kits and a safe environment to live in. we are providing food, some ration such as rice, flour, pulses to the people for they can have a safe life at their home inside under this lockdown period.

We are providing soaps to people who cannot buy sanitizers and soaps on the regular basis and also providing them home made masks and making them aware about having perfect hygiene, clean surroundings, and for maintaining the social distancing norms as per guidelines of the government.

It is very important for all of us to support each other and come over this pandemic. Through the organization we are trying to hold the areas of people who are far from their homes and not having money to buy food and general essentials for them. We are trying to reach the people who are in need and providing them some essentials that they would be no need of going out and can follow the rules of social distancing properly.
